

Stable Internet, One Cable Away

Bye-Bye Adapters, Hello Future!

Our January technology upgrade is now available in additional variants: As a slim version and in white and grey – each in lengths of 1 m to 15 m. The innovative Ethernet solution is perfect for all USB A and USB C™ devices without their own RJ45 port. A technological advance that improves the daily lives of all internet users. In offices, wireless LAN often reaches its limits: Security risks, unstable connections, limited speed. The smart chip in the USB plug eliminates bulky adapters, keeps the LAN powerful and connects modern devices to the internet with just a single cable.

Plug & Play

The nifty smart chip built into the USB plug replaces the previously required, complicated RJ45-to-USB-C™ or RJ45-to-USB-A adapter.
